**Tariff Format**

- A. **Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Page 14 and 15 would be 14.1.
  
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4<sup>th</sup> revised Page 14 cancels the 3<sup>rd</sup> revised Page 14. Because of various suspension periods, deferrals, etc., the Michigan Public Service Commission follows in its tariff approval process, the most current page number on file with the Michigan Public Service Commission is not always the tariff page in effect. Consult the Check Page for the page currently in effect.
  
- C. **Paragraph Numbering Sequence** - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level:
  - 2
  - 2.1
  - 2.1.1
  - 2.1.1.1
  
- D. **Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

**SECTION 2. RULES AND REGULATIONS (Cont'd)****2.8 Credits for Interruptions in Service (Cont'd)****2.8.2 (Cont'd)**

- 2.8.2.2 For purposes of this Section, "Service Outage" means the break in transmission measured from the first ten (10) consecutive severely erred seconds ("SESs") on the affected Company circuit until the first ten (10) non-SESs which is known by the Company. An SES is measured with a bit error ratio of greater than or equal to 1 in 1000. To be eligible for a credit under this Section, the Service Outage must last for more than sixty (60) consecutive minutes. Service credits shall be deducted from the charges payable by Customer hereunder and shall be expressly indicated on the next bill to Customer. Customer will provide Company with the information necessary to validate the Service Outage and whether a credit is due under this Section. If the Customer reports Services or a facility or circuit to be unavailable but declines to release it for testing and repair, it is considered to be impaired, but shall not be deemed a Service Outage.
- 2.8.2.3 Service credits shall not apply to "Excused Outages", which are defined as outages (i) caused by the negligence or acts of Customer and/or its end user, affiliates, agents or representatives, (ii) the failure or malfunction of equipment or systems that are owned or controlled by Customer or Customer's agents or other third party (including off-net facility providers); (iii) a Force Majeure Event; (iv) during any period in which the Company is not given access to the service premises; or (v) a planned Service Outage, including planned network testing or maintenance, and unscheduled emergency, maintenance, alteration or implementation.
- 2.8.2.4 Within sixty (60) days after the Service Outage occurs, Customer shall provide a written or oral request to the Company for a service credit. If Company confirms the Service Outage qualifies for a credit hereunder, the Company will grant the service credit within thirty (30) days from receipt of said notice. Unless otherwise specifically stated, Service Outages are not aggregated for purposes of determining the credit allowance.
